

M2M – Technology Overview

Girish Subramanya
ConnectM Technology Solutions

What is M2M?

- **Machine to Machine (M2M)** refers to data communications between machines
- **IOT** refers to "Internet of Things"

Typical Machines/Things from our world...

- Meters (energy/water)
- Automobiles
- Industrial Cranes
- ATM Machines
- Vending Machines
- Air Conditioners
- Refrigerators
- Medical Diagnostics Equipments

Typical M2M Solution

Enhance productivity | Improve utilization of assets | Maximize availability
Minimize operating cost | Optimise energy consumption

IRIS, ConnectMi are trademarks being considered for registration

M2M – Market Opportunity

Global Machine to Machine (M2M) Market worth \$85.96 Billion by 2017*
