

Message From Chairs: NetHealth 2018

The theme for the Nethealth workshop 2018 is “**Leveraging Technology for Healthcare**”. The NetHealth Workshop 2018 focuses to bring together leading clinicians, industry stalwarts, mobile health pioneers, engineers, designers and entrepreneurs to a common platform to learn, teach and connect to better understand and work on healthcare technologies for India.

The event will include **9 paper presentations** on recent healthcare innovations ranging from mobile health, medical devices, and healthcare IT solutions. It will also include **2 keynote speeches** from eminent leaders within the healthcare community discussing applications of AI and machine learning in healthcare as well as innovation platforms to develop technologies. There will be **2 panel discussions** on process and product innovations present and needed in India. There will be a chance to interact with the innovative teams and better understand their products on a one on one basis.

We hope that as a result of this intermingling of various domains; we can build synergies among the multidisciplinary participants to help in the development of new healthcare technologies for India.

As the chairs of this workshop, we are very excited to share that we are expecting the attendance of doctors, engineers and healthcare professionals from various backgrounds in this workshop. We plan to have a very **interactive session** so anyone interested in active participation for learning and sharing in medtech is most welcome. We are looking forward to seeing you there.
